*La Granja: The Dice Game - No Siesta!* is a standalone dice game followup to the hit boardgame *La Granja*.

In this game players collect resources by crossing them off on their scoring sheet. They can hire helpers for their special effects or even build a barn to store goods. And sometimes they need to have a little time off with a well-timed siesta!

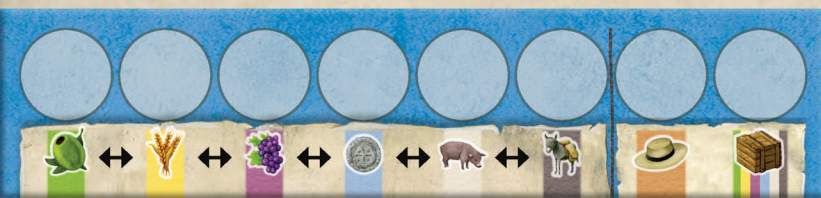

This game uses the same dice mechanism from the original board game, but creates a much faster, lighter game experience.

Each round the players roll the dice and draft them until everybody has at least three dice they can score. Once a player completes the siesta track, the game ends. Whoever collected resources in the most effective way will win the game!
